10/2018 – 11/2018

Remote

Achievements/Tasks

- Debugged minor issues with the site, both in the backend with PHP and the frontend as well
- Used Bitbucket to merge changes as well as pull down changes

Contact: Michael Latishaw – jmichaelterenin@gmail.com

Designer

Freelance

11/2018 – 11/2018

Lynnwood, WA

Achievements/Tasks

- Designed a logo and website layouts for a friend's company called Open Mind Tutoring Company
- Used Adobe Illustrator for the logo and AdobeXD for the website layouts

PERSONAL PROJECTS

Blackjack

- Built a front end web application for the game of blackjack using Vanilla JavaScript DOM manipulation.

Good Market

- This is an application where a user can buy and sell goods online. A seller can post an item and can then donate a percentage of their revenue towards a charity of their choice. The buyer can see what charity the seller selected. This project was built with a team of 3. As the Git master, I was in charge of merging the commits. I also played a major role in planning out the models, coding them out, and also contributed heavily to the CSS. This project was built with Python and Django.

Social Network

- Created a social network using the React framework. This includes a timeline for posting comments, a friends list, a photos section, and an about section. Currently using jsonplaceholder.com to populate the site by fetching with axios. React Router is used for navigating the site to optimize navigation speed.

EDUCATION

Web Development Immersive

General Assembly

05/2018 – 08/2018

Seattle, WA

Associate of Arts Business

Edmonds Community College

09/2010 – 06/2013

Lynnwood, WA
